New

F9.9, F15/F20

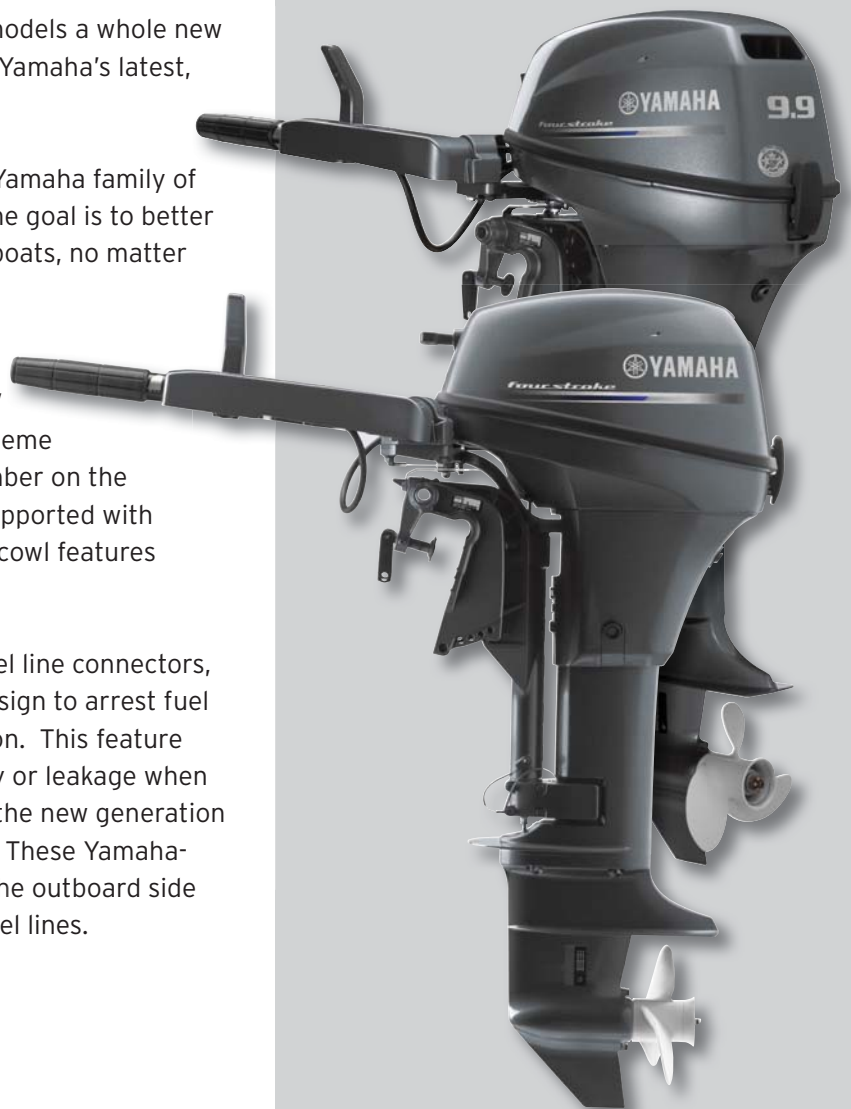

Bold new look on select portables

Yamaha will give its F9.9, F15 and F20 models a whole new look patterned after the appearance of Yamaha's latest, trend-setting outboards.

The changes are designed to unify the Yamaha family of outboard products. At the same time, the goal is to better complement the look of today's newer boats, no matter what the size, make or model.

The new look features a bold lower stripe that emphasizes the "four-stroke" moniker using italic type. Adding to a theme of speed and style, the horsepower number on the back of the cowl is also italicized and supported with the "four stroke" logo. The front of the cowl features the "Yamaha" logo.

The portables will use Yamaha's new fuel line connectors, which employ a twist-on locking seal design to arrest fuel flow prior to connection or disconnection. This feature helps reduce the potential for fuel spray or leakage when the fuel line is removed or installed, as the new generation portable fuel tanks may build pressure. These Yamaha-specific connectors are found on both the outboard side and the tank side of the new Yamaha fuel lines.
